Join us as we celebrate Modeling the Future Challenge students, their families, schools and communities.

What We Do

The Actuarial Foundation is a 501(c)(3) organization committed to changing lives through math education and financial literacy. Established in 1994, the mission of the Foundation is to enhance math education and financial literacy through the talents and resources of actuaries.

Modeling the Future Challenge

The Modeling the Future Challenge (MTFC) began three years ago and is now poised to become one of the premier math modeling competitions for high school students across the United States. Educators consistently rank providing “real-world connections” as one of the number one needs for their mathematics classrooms. Sponsoring the MTFC is an opportunity for your organization to demonstrate its commitment to providing high school students with a program where they can demonstrate the real-world power of mathematics, data analytics, actuarial science and critical thinking by analyzing and predicting how new technologies will impact our future.
